

Plastic press fastener

(1)

(3)

(2)

(1)

Our plastic press fasteners are renowned for its quality. They are available in two sizes; P3 and P6., suitable for rain wear, light workwear, rucksacks etc.

Description

The plastic press fastener is of ring spring type and is made in three parts; cap (1), spring (2) and stud (3). The cap should be used twice. P6 is available in two different cap sizes that either could be combined or used separately.

The plastic press fasteners are made of polyacetal. They can be supplied in many different colours.
